Subject Index

3d–5d hybridization 1

a-$Se_{65}Te_{20}Sb_{15}$ 286
Ab-initio calculation 81
Acceptor–bridge–donor 262
AgCl 173
Alloys 114
Amorphous hydrogenated silicon 198
Amorphous thin films 138
Andreev level tunneling 249
Atom-size contact 69

BAs 229
BN 229
BP 229
Break-junction 69
Bremsstrahlen isochromat spectroscopy 178

$Ce_{1-x}Gd_xCo_2$ compounds 1
Chalcogenides 207
Cittert–Zernike theorem 34
Conductance quantization 69
Copper oxides 312
Coulomb energy 149
Cr^{3+} 173
Crystal field 167
Crystal- and ligand-field theory 173
Cuprates 186
Current deviation 96
Current-phase relation 249
Current 63
Cutoff feature 249

Density functional theory 81
Diamond 149
Differential scanning calorimetry 198
Dimerization 55
Dimer 127
Disulphide 15

EPR 167, 262
EXAFS 15

Electron delocalization 262
Electron paramagnetic resonance 173
Electron transport 21
Electron–phonon scattering 21
Electronic density 81
Electronic structure 114, 127, 178, 229
Electronic transport 244
Energy bands 55
Energy-dispersive X-ray diffraction 268

First order 223
Flipping motion 223

GaSe single crystal 216
Glasses 28, 207
Gold 114

Heat transport 96
High pressure 28, 268
Hydrogen ordering 149

Ice 149
Infrared spectra 28
Integer quantum Hall effect 91

KNO_2 223

Lattice parameter 1
Linear magnetoresistance 96
Liquid alloys 106
Liquid metals 106
Local structures 173
Localized defect levels 216
Logarithmic dispersion relation 319

Magnetic anisotropy 138
Magnetic exchange interactions 1
Magnetic form-factor 312
Magnetic structure 76
Magnetic transition 76
Magnetotransport 96
Manganites 186
Markovian dephasing 63
Mean-field phenomenological model 1
Metastability 198
Molecular field calculation 76
Muffin tin potential 106

n-InSb 96
Nanostructures 244
Nanowire 69
Nd spin waves 295
$NdCo_2Si_2$ 76
Near edge X-ray absorption spectroscopy 114
Neutron scattering spectroscopy 160
Neutron scattering 34
Noncollinear Nd_2CuO_4 295
Nonlinear waves 274

Optical constants 207
Optical properties 28, 178
Order–disorder 223
Organic ferromagnets 55
Oxygen ordering 237

Partial coherence 34
Phase retrieval 319
Phase shifts 106
Phase transitions 223, 262, 268
Photoconductivity 286
Photocrystallization 286
Photoemission 178
Piperidine 262
$PrBa_2Cu_3O_{7-\delta}$ 237

Quantum point contact 69
Quasi-energy bands 63

RPA theory 295
Reentrant spin glass 138
Refractive index 28
Relaxation processes 198
Resistivity 106

SNS junction 249
Semiconducting surfaces 81, 127
